Campaign against AI Slop

- Content warning for creepy images and talk of the alt right and fascism
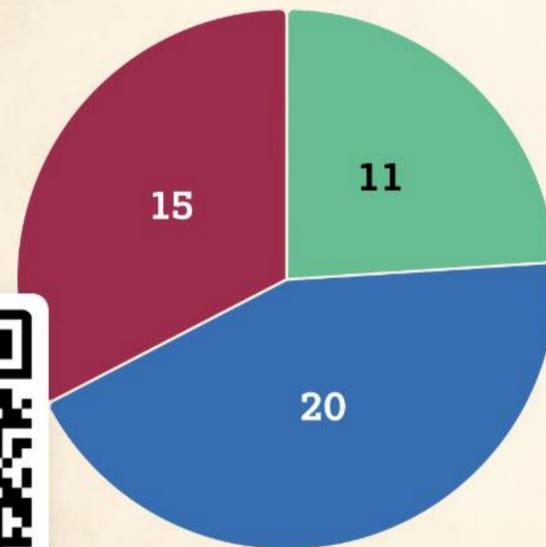

- Scan the code!

What do you say to the barkeep?

- 11 What is happening?
- 20 What are the specials?
- 15 Is this place real?

How to recognize AI images

- Hands and Text are no longer the only indicator

- Zoom in

- Check the boundaries between things

- Tiny details

- Repeating patterns

- Made for a quick look, not a close one

How to recognize AI Video

- Slow it down

- Zoom in
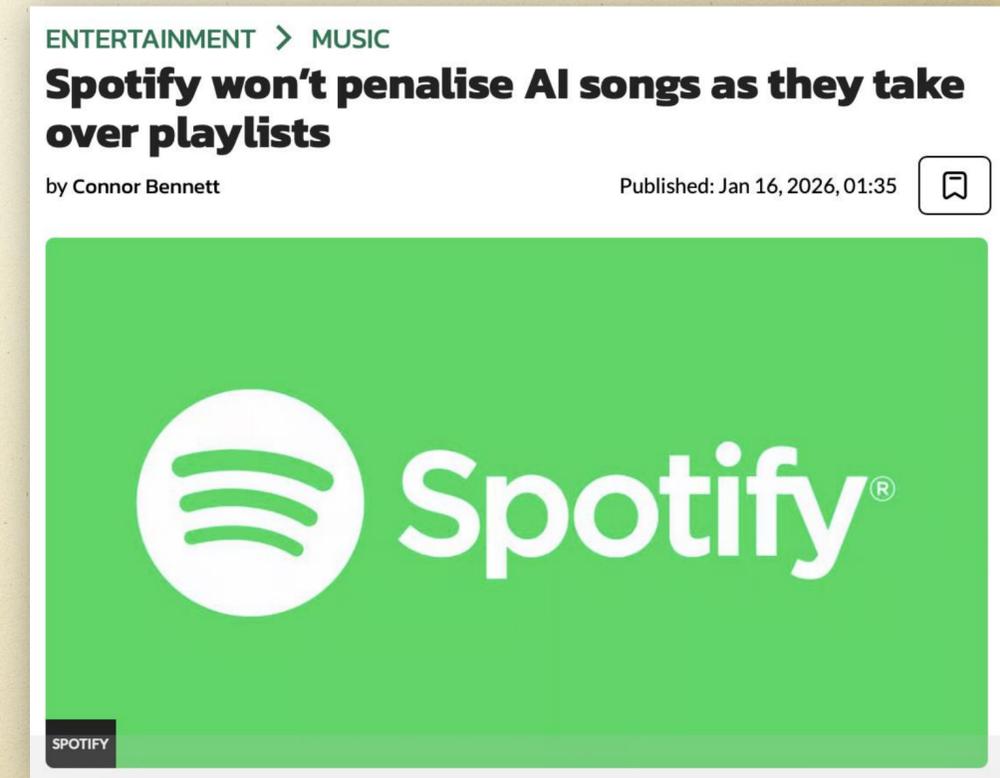

- Quick cuts, short sequences

- Use logic

- Interpoation

How to recognize AI Text

- Em-dashes

- Hidden Unicode

- It's not just THIS it's THIS

- **Bold** for **emphasis**

- Messed up facts

- Lack of an opinion

- **AI-generated text often looks polished and readable**, but attention drifts. You read it, yet nothing quite lands.
- It relies on **recognizable patterns** — em dashes, tidy formatting, balanced phrasing, confident tone without concrete claims.
- The writing is **formulaic and generic**, designed to scale, not to mean. It says a lot while communicating very little.
- Opinions are **carefully neutral**, optimized to appeal to the widest possible audience and avoid friction.
- By trying to be **helpful, accessible, and broadly applicable**, the text becomes hollow and interchangeable.
- The result is **extra cognitive labor** for the reader: facts, sources, and claims all require verification.
- Some systems also include **hidden Unicode markers or watermarks**, adding invisible structure beneath an already artificial surface.

How to recognize AI Music

* Wobble in sustained notes, like a bending

* Safe

* Homogenous

Search Settings

General | Appearance | Privacy | **AI Features**

Duck.ai   Off

Duck.ai lets you have anonymous conversations with 3rd-party AI chat models, including models from OpenAI, Anthropic, and others. Turning this setting off will hide Duck.ai buttons and links on DuckDuckGo Search. However, you can still access Duck.ai when this setting is off by visiting https://duck.ai directly.

Search Assist   Never

Search Assist anonymously generates answers for search queries. To do this, it scans the web for relevant content and then uses AI to generate a brief answer. You can choose how often you want it to appear: Never, On-demand (only when Assist is clicked), Sometimes (when highly relevant), or Often (on a wide range of searches). For now, Search Assist is only available in a subset of English speaking regions.

Hide AI-Generated Images   On

Filters out AI-generated images from image search results. Learn more

US Department of Homeland Security turns Santa into an ICE agent in 'digusting' AI video

Story by David Mouriquand • 3w • ⏱ 1 min read

In an attempt to push more people toward a paying subscription, Grok now refuses to generate images in replies. The paywall is pretty leaky, though.

NOVEMBER 3, 2025 / ARTSMNC

This is how the AI bubble will burst

The artificial intelligence-fuelled market euphoria is a new telling of an old story that will not play out differently this time – but it may have some way still to go.

Thank you!
